

ARCTIC POWER

Long Lasting Alkaline Batteries for Power Users

Main Features

- Available in AA and AAA
- High nominal capacity – 1300 mAh (AAA) and 2900 mAh (AA)
- Mercury / lead / cadmium free
- High performance in extreme conditions
- 5-year shelf life
- Excellent price-performance ratio
- Suitable for high-power devices

ARCTIC POWER

Long Lasting Alkaline Batteries for Power Users

Durable, long-lasting, powerful. With capacity of 1,300 and 2,900 mAh in AA and AAA size respectively, the **ARCTIC POWER** is a high-performance alkaline battery you can trust. Its 5-year shelf life guarantees stable and durable energy supply – even in extreme environment. The **ARCTIC POWER** is ideal for all kind of applications such as radios, clocks, keyboards, CD / MP3 players, remote controls etc.

Specifications:

	ARCTIC POWER (AA)
Classification:	Alkaline
Designation:	ANSI-15A, IEC-LR6
Normal voltage:	1.5 Volts
Normal capacity:	2,900 mAh
Operating temperature:	-30°C to +50°C
Chemistry:	Zinc-Manganese Dioxide (Zn/MnO ₂) No mercury / cadmium / lead added
Terminal:	Cap, Base
Jacket:	Aluminium foil
Average weight:	23.5g
Shelf life:	5 years

	ARCTIC POWER (AAA)
Classification:	Alkaline
Designation:	ANSI-24A, IEC-LR03
Normal voltage:	1.5 Volts
Normal capacity:	1,300 mAh
Operating temperature:	-30°C to +50°C
Chemistry:	Zinc-Manganese Dioxide (Zn/MnO ₂) No mercury / cadmium / lead added
Terminal:	Cap, Base
Jacket:	Aluminium foil
Average weight:	11.9g
Shelf life:	5 years
